## ***Skin Rejuvenation & Lipo-Rescue Treatments***

### **Skin Rejuvenation – 6 Treatments**

Our Skin Rejuvenation treatments are completely natural, safe, affordable, requires no down time or recovery time, contains no UV radiation, pain free, quick and effective. With our technology and expertise, we have the ability to make your skin look dramatically younger and healthier in less than two weeks!

This amazing technology causes your skin cells to naturally produce incredible amounts of collagen and elastin in a very short period of time. This means, that your skin actually becomes smoother, firmer, healthier and fine lines, wrinkles and blemishes disappear like magic! Contains no UV radiation, pain free, quick and effective.

### **Lipo-Rescue - 6 Treatments**

If you are looking for help with Lipo-Rescue, your Technician can address this during your consultation.

If you are looking for help with Lipo-Rescue, your Technician can address this during your consultation.

## FAQ: Skin Rejuvenation, Non-Invasive Facelift and Skin Tightening with UltraSlim® Treatments

### Non-Invasive Facelift Treatments

Age 75 – Before and After 4, 20-Minute Treatments

With the non-invasive facelift treatment, take 10 – 15 years off your face in only two weeks! UltraSlim® significantly improves your skin and neckline. Maintain your youthful appearance with monthly touch-ups. Contains no UV radiation, pain free, quick and effective.

### Skin Tightening Treatments

The UltraSlim® skin tightening treatment visibly reduces the appearance of loose skin. Each treatment lasts about 20 minutes per area. You can request this service as a standalone or it could be combined with other services. Contains no UV radiation, pain free, quick and effective. Call (979) 693-6100 or email, [rwomack\\_usa@superslowzone.com](mailto:rwomack_usa@superslowzone.com), for a free consultation today.

## FAQ

### 1. Treatment Plan & How Many Sessions – to Achieve Your Goals

- During your complementary consultation, we discuss your treatment plan regarding how many sessions we anticipate it will take to achieve our agreed upon goals. This will include reviewing client results photos.

## FAQ: Skin Rejuvenation, Non-Invasive Facelift and Skin Tightening with UltraSlim® Treatments

- We can also discuss this service as a standalone or it could be combined with other services.

### 2. Skin Rejuvenation

- A typical care plan is a total number of 6 sessions, 3 treatments a week for two weeks.
- We use a special type and dose of our unique phototherapy to shrink fat cells and **produce collagen**, which naturally results in smoother, younger-looking skin with reduced appearance of lines, wrinkles, and dark spots.
- Increased elastin works with collagen to tighten the skin, for a younger, firmer appearance.
- 7 days for the collagen and elastin to fully bloom.

### 3. Non-Invasive Facelift Treatments

- A typical non-invasive facelift care plan is a total 6 sessions, 3 treatments a week for two weeks.
- We will tailor each session to get the results you want to achieve.
- We will help you get ready before your appointment to ensure maximum results - and then you choose whether you want to target areas of your face and chin for fat loss - or just to focus on reducing the lines and wrinkles.
- We use a special type and dose of our unique phototherapy to shrink fat cells and **produce collagen**, which naturally results in smoother, younger-looking skin with reduced appearance of lines, wrinkles, and dark spots.
- Increased elastin works with collagen to tighten the skin, for a younger, firmer appearance.
- 7 days for collagen and elastin to fully bloom.

### 4. Skin Tightening

- The UltraSlim® skin tightening treatment visibly reduces the appearance of loose skin. Each treatment lasts about 20 minutes per area.
- You can request this service as a standalone or it could be combined with other services.

***Is This Physician-Supervised at SSZ College Station? Yes.***

### **Safety**

#### 1. Is UltraSlim safe?

- Yes, UltraSlim is perfectly safe.

## **FAQ: Skin Rejuvenation, Non-Invasive Facelift and Skin Tightening with UltraSlim® Treatments**

- There have been no reports of anyone ever experiencing any side effect or bad outcome.
- Some people ask if UltraSlim is too bright. UltraSlim is NOT as bright on your skin as walking into the midday sun and UltraSlim does not include dangerous UV rays like the sun.

### **2. How bright is UltraSlim? Is there any danger?**

- The light outside is four times brighter than the light from an UltraSlim device. Unlike sunlight, UltraSlim is pure red light and does NOT include UVA or UVB rays.

### ***Any Contraindications to UltraSlim?***

#### **3. Are there any contraindications to using UltraSlim?**

- Yes.
- We have a list that you would know about prior to learning about UltraSlim so that we do not waste your time.

### ***Invention of UltraSlim, FDA Clearance, and Patents***

#### **4. How was UltraSlim invented?**

- Light therapy has been used in the United States for over 40 years, but only recently has the technology been advanced enough to provide fat reduction, as well as, tightening and rejuvenating of the skin. This type of light therapy has been used in hospital burn units for accelerated healing, as part of “smart” liposuction and non-narcotic pain relief.
- In 2011, *Terry J. Ward, M.H.A.* invented the patented UltraSlim fat reduction process at their head office in Orlando, Florida. Together with research by UltraSlim employees Robyn Hovey and NASA-veteran Heidi Araya, Ward developed a new generation of non-laser light therapy using light-emitting diodes (LEDs).
